

Page 2-4

THREE-POLE CONTACTORS

- IEC Ith ratings in AC1 duty at $\leq 40^{\circ}\text{C}$: 16 to 1600A
- IEC Ie ratings in AC3 440V duty: 6 to 630A
- IEC Power ratings in AC3 400V duty: 2.2 to 335kW
- UL/CSA ratings: 3 to 500HP at 480V and 600V
- AC, AC/DC, DC and DC low-consumption coil.

Page 2-8

FOUR-POLE CONTACTORS

- IEC Ith ratings in AC1 duty at $\leq 40^{\circ}\text{C}$: 20 to 1600A
- IEC Power ratings in AC1 400V duty: 14 to 950kW
- UL/CSA general use: 16 to 1000A
- AC, AC/DC, DC and DC low-consumption coil.

Page 2-12

FOUR-POLE CONTACTORS WITH 2NO+2NC MAIN POWER POLES

- IEC Ith ratings in AC1 duty at $\leq 40^{\circ}\text{C}$: 20 to 115A
- UL/CSA general use: 20 to 115A
- AC, AC/DC, DC and DC low-consumption coil.

Page 2-13

FOUR-POLE CONTACTORS WITH 4 NC POLES FOR PHOTOVOLTAIC APPLICATIONS

- IEC Ith ratings in AC1 duty at $\leq 40^{\circ}\text{C}$: 25 to 40A
- UL/CSA general use: 20 to 55A for 4NC types
- Operational current up to 125A (DC1 at $\leq 55^{\circ}\text{C}$ with 4 NO poles in series) for photovoltaic applications.
- AC, AC/DC, DC and DC low-consumption coil.

Page 2-14

CONTACTORS FOR POWER FACTOR CORRECTION

- With limiting resistors included
- IEC Power ratings at 400V: 7.5 to 75kvar
- UL/CSA ratings: 9 to 80kvar at 480V; 10 to 100kvar at 600V
- AC coil.

Page 2-15

CONTROL RELAYS

- AC, DC and DC low-consumption coil
- Screw or Faston termination
- 4, 8 or 11 auxiliary contact composition.

LOVATO Electric contactors are suitable for new motors with high IE3 efficiency values

- Three-pole versions up to 630A in IEC AC3 duty
- Four-pole versions up to 1600A in IEC AC1 duty
- Versions for power factor correction up to 75kvar at 400VAC
- Four-pole versions with 2NO+2NC or 4NC main poles
- Versions for photovoltaic application
- Versions with AC, AC/DC or DC control
- Low-consumption versions with DC control circuit for control relays and 9-38A contactors in IEC AC3 duty
- Extensive choice of add-on blocks and accessories
- Certified by primary international authorities.

BG series mini-contactors

2

- Highly conductive auxiliary contacts with four contact points
- AC and DC versions of same size
- Quick connect - snap on accessory mounting
- Distinct contact status indication
- Up to four auxiliary contacts can be mounted
- Mechanical interlock only 5mm deep
- Positive (force) guided contacts (mechanically-linked per IEC)

- Three-pole mini-contactors, 6 to 12A IEC AC3 duty / 3 to 7.5HP 480V - 3 to 10HP 600V UL/CSA
- Four-pole mini-contactors, 20A IEC AC1 duty
- Versions with 2NO+2NC main power poles
- Highly conductive auxiliary contacts
- Coils with AC or DC supply
- Low-consumption DC versions
- Screw, faston and rear PCB solder pin termination.

BF series contactors

- Highly conductive auxiliary contacts with four contact points
- Quick connect - snap on accessory mounting
- Distinct contact status indication
- Up to four auxiliary contacts can be mounted
- Mechanical interlock only 5mm deep
- Positive (force) guided contacts (mechanically-linked per IEC)

- Three-pole contactors, 9 to 110A IEC AC3 duty / 5 to 75HP 480V - 7.5 to 100HP 600V UL/CSA
- Four-pole contactors, 25 to 125A in AC1 duty
- Power factor correction contactors, 7.5 to 75kvar at 400V IEC / 9 to 80kvar at 480V UL/CSA
- Types with 2NO+2NC or 4NC main power poles
- Types for photovoltaic applications
- Highly conductive auxiliary contacts
- Coils with AC or DC supply
- Wide-range coils with electronic control for contactors from 40 to 80A AC3
- Low-consumption versions for control relays and 9-38A contactors in IEC AC3 duty.

① Low-consumption version.
② Wide-range coil with electronic control.

B series contactors

- 3 frame sizes offering 11 different contactors
- Coil operates indifferently on AC or DC supply voltage
- Coil with low in-rush and holding
- Coil removable without disconnecting power wiring
- Red indicator when contactor is energised
- Unique right-angle magnet design - limits contact bounce
- Safety feature prevents contactor to be energised without arc chute in place and locked
- Convertible auxiliary contact block (2NO + 1NC or 1NO + 2NC), maximum of 4 blocks per contactor for a total of 12 contacts
- Contactor terminals with bolt, washer and nut
- Simple horizontal or vertical interlock
- Positive (force) guided contacts (mechanically-linked per IEC)

- Three-pole contactors, 110 to 630A IEC AC3 duty
- Four-pole contactors, 160 to 1600A IEC AC1 duty
- 100 to 500HP 600V UL/CSA
- Coils with AC/DC supply
- Screw termination.

① For AC1 / general use duty only.

THE IDEAL SOLUTION!

- **45mm WIDE CONTACTORS**
 Ratings up to 38A - 18.5kW IEC AC3 / 30HP UL - merely 45mm wide: exceptional benefit for electric panel dimensions.
- **55mm WIDE CONTACTORS**
 Up to 80A in AC3 (45kW) with a width of just 55mm.
- **COILS WITH WIDE OPERATING RANGE**
 BF...D contactors are equipped with a wide operating range coil and are particularly useful in applications subject to considerable voltage variations, such as in electric traction railway equipment.

- **4-TERMINAL COIL**
 Connecting cables can be coupled to the coil both on the line and load ends of the contactor.
- **ELECTRONIC COIL**
 Contactors from 40 to 80A AC3 can be equipped with AC/DC electronic coil with wide operating range.
 Example: single 100 to 250V AC/DC coil.
- **BUILT-IN SURGE SUPPRESSOR**
 BF series contactors up to 80A AC3 with voltages in DC or AC/DC already have a built-in surge suppressor.
- **LOW-CONSUMPTION COILS**
 The BF...L contactors feature a 2.4W low consumption. This characteristic widely allows their direct control by PLC outputs.

2

- **SIDE ADD-ON FOURTH POLE**
 For the 45A to 115A AC1 ratings, a side-mount fourth power pole can be snapped on the three-pole contactor. This solution permits to optimise inventory.

- **MECHANICAL INTERLOCK**
 Smaller-size contactors, 9 to 25A in AC3, can be mechanically and electrically interlocked with larger-size contactors, 26 to 38A AC3. The BFX50 01 and BFX53 01 mechanical interlock comprises two built-in NC auxiliary contacts to make the electrical interlock as well.

- **35MM IN RAIL MOUNTING AND FIXING**

Contactors mounting on and removal from a 35mm DIN rail are tool-less operations and are done by simply applying pressure on the contactor.

- **STARTER ASSEMBLY**
 The assembly and wiring of electromechanical starters is extremely fast and reliable. Versatile electrical and mechanical connecting systems provide easy and foolproof assembly of compact starters.

- **EFFORTLESS THERMAL OVERLOAD RELAY LINK RF38 AND RF82 TYPES**

During the connection of the thermal overload relay to the contactor, its auxiliary contact is simultaneously linked to the contactor coil terminal rigid connector. The complete overload relay fixing is obtained with one single operation and without other connections.

- **TERMINAL ADAPTABILITY**
 Terminals are suitable for every type of cable: flexible, rigid, according to AWG standards and interlocked with any type of cable terminal. For BF09...BF38 contactors, a single type of screwdriver tightens the screws for the power contacts, auxiliary contacts and coil.

- **SNAP-ON INSTALLATION**

On the contactors, it's quick and easy to fit and remove auxiliary contacts and accessories, without using tools; the same applies to replacing the coil in the AC BF09...BF38 contactors.

- **RUBBER PAD INSERT FOR NO DIN RAIL SLIDING**

A rubber insert prevents the contactors from sliding on the 35mm DIN rail even when out of tolerance or mounted vertically.

- **BREAKER-CONTACTOR CONNECTIONS**
 The rigid connections between breaker and contactor allow complete compact starters to be created easily, quickly and with less space used in the panel. It is fitted on a single DIN rail.

- **IP20 CONNECTION SECURITY**

For BF09...BF38 contactors, the easy access and space for the terminals is combined with IP20 protection, preventing accidental contact with live parts.

- **DOUBLE LUG TERMINALS**
 40 to 80A AC3 contactors are equipped with double lug terminals for easy, functional access for power cables. It is extremely simple to create star-delta starters, reversing switches, changeovers and arrange parallel supply for several contactors.

① Complete order code with coil voltage digit or with voltage digit followed by 60 (if 60Hz). Standard voltages are as follows:
 - AC 50/60Hz 024 / 048 / 110 / 230 / 400V
 - AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).
 Example: 11 BG06 10 A230 for mini-contactor BG06, three poles, with one NO contact and 230VAC 50/60Hz coil.
 11 BG06 10 A460 60 for mini-contactor BG06 with one NO contact and 460VAC 60Hz coil.

② The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage. Standard voltages are:
 - AC/DC 24 / 48 / 60 / 110-125 (indicate 110) / 220-240 (indicate 220) / 380-415 (indicate 380) / 440-480V (indicate 440).
 Example: 11 B145 00 110 for contactor B145, three poles, without auxiliary contacts and with 110-125VAC/DC coil.
 The 24VAC/DC voltage is not possible for B500-B630 1000 contactors.
The 24VAC/DC voltage is not possible for B500-B630 1000 contactors.
 Other voltages available on request.

③ If predisposed for mechanical latch (G495), the order code becomes 11 B...SL.00 ②
 If already fitted with mechanical latch (G495), the order code becomes 11 B...L.00 ② ④.

④ Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC. Available voltages are:
 - AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
 - DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
 Example: 11 B145L 00 110 220 for contactor B145 without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 220-240VAC.

⑤ G495 mechanical latch cannot be mounted.

⑥ Complete the order code with the digit of the coil voltage. For 110-125VAC (50/60Hz) indicate 110 or 220-240VAC (50/60Hz) indicate 220.
 Example: 11 B1250 24 110 for contactor B1250, three poles, with 2NO+4NC auxiliary contacts and 110-125VAC 50/60Hz coil.

⑦ Maximum voltage is limited at 300V for UL. For certified type up to 600V, consult Customer Service for information; see contact details on inside front cover.

⑧ For voltages 024 / 230 / 400VAC 50-60Hz: 10 pieces/package.
 For all other voltages: 1 piece/package.

⑨ Highly conductive auxiliary contact.

⑩ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.

⑪ No UL/CSA ratings; data given for indication and reference purposes only.

⑫ Definite-purpose (DP) contactors are available. Consult Customer Service for information; see contact details on inside front cover.

- UL - UL Listed, for USA and Canada (cULus - File E93602) for BG... BF110 types indicated, as Motor Controllers - Contactors, except for BGP09... types which are UL Recognized, for USA and Canada (File E93602 - Component - Products having this type of marking are intended for use as components of complete workshop-assembled equipment). BGP is UL rated up to 300V; for type with rating up to 600V, consult Customer Service for information - see contact details on inside front cover. UL Listed for USA only (File E93602) for B115...B400 types indicated, as Motor Controllers - Contactors. UL Listed for USA and Canada (cULus - File E172189) for B500... B630 1000 and B500 SL... B630 SL types as Industrial Control Switches.
- CSA - BF09...BF95 and B115...B400 contactors are also CSA certified, for Canada only (File 54332). In addition, BF12..., BF25..., BF38... and BF65... types are CSA certified as "Elevator Equipment" (File 54332, class 2411). See technical characteristics on page 2-63 for BF12-BF38 and page 2-65 for BF65.
- Ⓢ This contactor has also achieved CSA elevator equipment certification.

Compliant with standards: IEC/EN 60947-1, IEC/EN 60947-4-1, UL508, CSA C22.2 n° 14; UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials are compliant with standards IEC/EN 60335; for all BF09...BF38 versions only, add suffix V260 to the standard product order code. Example: BF09 10 A230V260 for BF09, three poles, with one NO contact and 230V 50/60Hz coil with compliant plastic materials.

- ① Complete order code with coil voltage digit. For BG09...D 24VDC version complete with built-in surge suppressor, add suffix **V120** to the standard order code. The BF09-BF38D types already have a standard supplied built-in TVS (Transient Voltage Suppressor). Standard voltages are as follows:
 - DC 012 / 024 / 048 / 060 / 110 / 125 / 220V.
 - Example: 11 BG06 10 D012 for mini-contactor BG06, three poles, with one NO contact and 12VDC coil.
 - 11 BG09 10 D024 V120 for mini-contactor BG09, three poles, with one NO contact and 24VDC coil, complete with built-in TVS (diode) suppressor.
- ② Low-consumption version. No add-on auxiliary contacts or mechanical interlock can be mounted on BG... type contactors. Complete order code with coil voltage digit. The BF09-BF38L types already have a standard supplied built-in TVS (Transient Voltage Suppressor). Standard voltages are as follows:
 - DC 024 / 048V.
 - Example: 11 BG09 01 L024 for mini-contactor BG09, three poles, with one NC contact and 24VDC low-consumption coil.
- ③ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range. The order code must be completed with the coil voltage digit. The standard voltages are as follows:
 - AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.

- ④ The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage. Standard voltages are:
 - AC/DC 24 / 48 / 60 / 110-125 (indicate 110) / 220-240 (indicate 220) / 380-415 (indicate 380) / 440-480V (indicate 440).
 - Example: 11 B145 00 110 for contactor B145, three poles, without auxiliary contacts and with 110-125VAC/DC coil.
 - The 24VAC/DC voltage is not possible for B500-B630 1000 contactors.
 - The 24VAC/DC voltage is not possible for B500-B630 1000 contactors.**
 - Other voltages available on request.
- ⑤ If predisposed for mechanical latch (G495), the order code becomes 11 B...SL.00 ④. If already fitted with mechanical latch (G495), the order code becomes 11 B...L.00 ④ ⑤.
- ⑥ Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC. Standard voltages are:
 - AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
 - DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
 - Example: 11 B145L 00 110 C48 for contactor B145, three poles, without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 48VDC.
- ⑦ G495 mechanical latch cannot be mounted.
- ⑧ Maximum voltage is limited at 300V for UL. For certified type up to 600V, consult Customer Service for information; see contact details on inside front cover.
- ⑨ Highly conductive auxiliary contact.

UL - UL Listed, for USA and Canada (cULus File E93602) for BG...BF110 types indicated, as Motor Controllers – Contactors, except for BGP09... types which are UL Recognized, for USA and Canada (. File E93602 – Component). Products having this type of marking are intended for use as components of complete workshop-assembled equipment.
BGP is UL rated up to 300V; for type with rating up to 600V, consult Customer Service for information – see contact details on inside front cover.
UL Listed for USA only (File E93602) for B115...B400 types indicated, as Motor Controllers – Contactors.
UL Listed for USA and Canada (cULus - File E172189) for B500...B630 1000 and B500 SL... B630 SL types as Industrial Control Switches.

CSA - BF09...BF95 and B115...B400 contactors are also CSA certified, for Canada only (File 54332).
In addition, BF12... BF25... BF38... and BF65... types are CSA certified as "Elevator Equipment" (File 54332, class 2411).
See technical characteristics on page 2-63 for BF12-BF38 and page 2-65 for BF65.

Ⓣ This contactor has also achieved CSA elevator equipment certification.

Compliant with standards: IEC/EN 60947-1, IEC/EN 60947-4-1, UL508, CSA C22.2 n° 14; UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

Plastic materials are compliant with standards IEC/EN 60335; for all BF09...BF38 versions only, add suffix V260 to the standard product order code.

Example: BF09 10 D024 V260 for BF09, three poles, with one NO contact and 24VDC coil with compliant plastic materials.

- ① Complete order code with coil voltage digit or voltage digit followed by 60 if 60Hz. Standard voltages are as follows:
 - AC 50/60Hz 024 / 048 / 110 / 230 / 400V
 - AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).
 Example: 11 BG09 T4 A230 for mini-contactor BG09, four poles, with 230VAC 50/60Hz coil. 11 BG09 T4 A460 60 for mini-contactor BG09, four poles, with 460VAC 60Hz coil.
- ② The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage. Standard voltages are:
 - AC/DC 24 / 48 / 60 / 110-125 (indicate 110) / 220-240 (indicate 220) / 380-415 (indicate 380) / 440-480V (indicate 440).
 Example: 11 B145 4 00 110 for contactor B145, four poles, without auxiliary contacts and with 110-125VAC/DC coil.
- The 24VAC/DC voltage is not possible for B500-B630 1000 contactors. **The 24VAC/DC voltage is not possible for B500-B630 1000 contactors.** Other voltages available on request.
- ③ If predisposed for mechanical latch (G495), the order code becomes 11 B...4SL 00 ②. If already fitted with mechanical latch (G495), the order code becomes 11 B...4L 00 ② ③.
- ④ Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC. Standard voltages are:
 - AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
 - DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
 Example: 11 B145 4L 00 110 C220 for contactor B145, four poles, without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 220-240VDC.

- ⑤ G495 mechanical latch cannot be mounted.
- ⑥ Complete the order code with the digit of the coil voltage. For 110-125VAC 50/60 Hz indicate 110 or 220-240VAC 50/60 Hz indicate 220. Example: 11 B1250 4 24 110 for contactor B1250, four poles, with 2NO+4NC auxiliary contacts and 110-125VAC/DC 50/60Hz coil.
- ⑦ Maximum voltage is limited at 300V for UL. For certified type up to 600V. Consult Customer Service for information; see contact details on inside front cover.
- ⑧ Whenever the BF26 T4 or BF38 T4 types need to be mechanically interlocked with either the BFX50 00 or BFX50 01, the add-on fourth pole of one of the contactors needs to be removed from the right side and fitted on the left side.
- ⑨ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.
- ⑩ Definite-purpose (DP) contactors are available. Consult Customer Service for information; see contact details on inside front cover.

IEC utilisation current with poles in parallel

If the poles of the contactors are arranged in parallel, the operating current is the one indicated in the table multiplied by the **K** factor given below, which account for the unequal distribution of the current in the various poles. To limit distribution inequality, it is advisable to use paralleling links (see pages 2-16, 2-21 and 2-26).

2 POLES in parallel: **K** = 1.6

3 POLES in parallel: **K** = 2.2

4 POLES in parallel: **K** = 2.8

- UL - UL Listed, for USA and Canada (cULus File E93602) for BG...BF110 types indicated, as Motor Controllers – Contactors, except for BGP09... types which are UL Recognized, for USA and Canada (.ULus File E93602 – Component). Products having this type of marking are intended for use as components of complete workshop-assembled equipment. BGP is UL rated up to 300V; for type with rating up to 600V, consult Customer Service for information – see contact details on inside front cover. UL Listed for USA only (File E93602) for B115...B400 types indicated, as Motor Controllers – Contactors. UL Listed for USA and Canada (cULus - File E172189) for B500 4... B630 1000 4 and B500 4SL... B630 4SL types as Industrial Control Switches.
- CSA - BF09...BF80 and B115...B400 contactors are also CSA certified, for Canada only (File 54332). In addition, BF12..., BF25..., BF38... and BF65... types are CSA certified as "Elevator Equipment" (File 54332, class 2411). See technical characteristics on page 2-63 for BF12-BF38 and page 2-65 for BF65.

⑦ This contactor has also achieved CSA elevator equipment certification.

Compliant with standards: IEC/EN 60947-1, IEC/EN 60947-4-1, UL508, CSA C22.2 n° 14; UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials are compliant with standards IEC/EN 60335; for all BF09...BF38 versions only, add suffix V260 to the standard product order code. Example: BF09 T4 A230 V260 for BF09, four poles, 230V 50/60Hz coil with compliant plastic materials.

- ① Complete order code with coil voltage digit.
The BF09-BF38D types already have a standard supplied built-in TVS (Transient Voltage Suppressor).
Standard voltages are as follows:
– DC 012 / 024 / 048 / 060 / 110 / 125 / 220VDC.
Example: 11 BG09 T4 D012 for mini-contactor BG09, four poles, with 12VDC coil.
- ② Low consumption version. Complete the order code with coil voltage digit.
The BF09-BF38L types already have a standard supplied built-in TVS (Transient Voltage Suppressor).
Standard voltages are as follows:
– DC 024 / 048V
Example: BF09 T4 L024 for contactor BF09, four poles, with 24VDC low-consumption coil.
- ③ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.
Complete the order code only with the digit of the coil voltage.
Standard voltages are:
– AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.
- ④ The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage.
Standard voltages are:
– AC/DC 24 / 48 / 60 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415 indicate 380 / 440-480V indicate 440.
Example: 11 B145 00 110 for contactor B145, four poles, without auxiliary contacts and with 110-125VAC/DC coil.
The 24VAC/DC voltage is not possible for B500-B630 1000 contactors.
The 24V voltage is not possible for B500-B630 1000 contactors.
Other voltages available on request.

- ⑤ If predisposed for mechanical latch (G495), the order code becomes 11 B...4SL 00 ④. If already fitted with mechanical latch (G495), the order code becomes 11 B...4L 00 ④ ⑥.
- ⑥ Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC.
Standard voltages are:
– AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
– DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
Example: 11 B145L 00 110 C48 for contactor B145, four poles, without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 48VDC.
- ⑦ G495 mechanical latch cannot be mounted.
- ⑧ Maximum voltage is limited at 300V for UL. For certified type up to 600V consult Customer Service for information; see contact details on inside front cover.
- ⑨ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.

UL - UL Listed, for USA and Canada (cULus File E93602) for BG...BF110 types indicated, as Motor Controllers – Contactors, except for BGP09... types which are UL Recognized, for USA and Canada (UL File E93602 – Component). Products having this type of marking are intended for use as components of complete workshop-assembled equipment.

BGP is UL rated up to 300V; for type with rating up to 600V, consult Customer Service for information – see contact details on inside front cover.

UL Listed for USA only (File E93602) for B115...B400 types indicated, as Motor Controllers – Contactors.

UL Listed for USA and Canada (cULus - File E172185) for B500 4... B630 1000 4 and B500 4SL... B630 4SL types as Industrial Control Switches.

CSA - BF09...BF95 and B115...B400 contactors are also CSA certified, for Canada only (File 54332).

In addition, BF12..., BF25..., BF38... and BF65... types are CSA certified as "Elevator Equipment" (File 54332, class 2411).

See technical characteristics on page 2-63 for BF12-BF38 and page 2-65 for BF65.

This contactor has also achieved CSA elevator equipment certification.

Compliant with standards: IEC/EN 60947-1, IEC/EN 60947-4-1, UL508, CSA C22.2 n° 14; UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

Plastic materials are compliant with standards IEC/EN 60335; for all BF09...BF38 versions only, add suffix V260 to the standard product order code.

Example: BF09 T4 D024 V260 for BF09, four poles, 24VDC coil with compliant plastic materials.

Mini-contactor four power poles, 2 NO and 2 NC BG series

- ① Complete with coil voltage digit if 50/60Hz or with voltage digit followed by 60 if 60Hz. Standard voltages are:
 - AC 50/60Hz 024 / 048 / 110 / 230 / 400V
 - AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).

- Example:
- 11 BG09 T2 A230 for mini-contactor BG09 T2, 2 poles NO and 2 poles NC, with 230VAC 50/60Hz coil.
 - 11 BG09 T2 A460 60 for mini-contactor BG09 T2, 2 poles NO and 2 poles NC, with 460VAC 60Hz coil.

- ② Complete the order code with coil voltage digit. Standard voltages are:
 - DC 012 / 024 / 048 / 060 / 110 / 125 / 220V.
 The BF18-BF26-BF38 T2D types already have a standard supplied built-in TVS (Transient Voltage Suppressor).

- Example:
- 11 BG09 T2 D012 for mini-contactor BG09 T2, 2 poles NO and 2 poles NC, with 12VDC coil.

- ③ Low consumption version with built-in TVS. Complete the order code with coil voltage digit. Standard voltages are:
 - DC 024 / 048V.

- Example:
- BF18 T2 L024 for contactor BF18 T2, 2 poles NO and 2 poles NC, with 24VDC low-consumption coil, supplied with TVS.

- ④ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range. Complete the order code with coil voltage digit. Standard voltages are:
 - AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.

- ⑤ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.
- ⑥ Maximum combinations of add-on blocks are given on page 2-19.

- Example:
 - BF18 TO A230 for contactor BF18 TO, 4 NC power poles, with 230VAC 50/60Hz.
 - 11 BFD80 40 024 for contactor BFD80 40, 4 NO power poles, with 24V 50/60Hz for photovoltaic application.

- ⓑ Complete the order code with coil voltage digit.
 Standard voltages are:
 - DC 012 / 024 / 048 / 060 / 110 / 125 / 220V.

- Example:
 - BF18 TO D012 for micro-contactor BF18 TO, 4 NC power poles, with 12VDC coil.

- ⓒ Low-consumption version. Complete the order code with coil voltage digit.
 Standard voltages are:
 - DC 024 / 048V.

- Example:
 - BF18 T2 L024 (low-consumption BF18 T2 contactor with 2 NO poles and 2 NC poles supplied at 24VDC).

- ⓓ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.
 Complete the order code with coil voltage digit.

- Standard voltages are:
 - AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.

- ⓔ IEC/EN 60947-1 designation: Pillar terminal.
 ⓕ Maximum combinations of add-on blocks are given on page 2-19.

General characteristics

The contactors are specifically made with magnetic elements in the arc extinction chambers to obtain high DC load operational capabilities. They are used to disconnect and isolate the load between the photovoltaic panel and the AC/DC inverter. For add-on contact blocks, accessories and spare parts, consider indications of the corresponding standard (11 BF80 40..., 11 BF80C 40..., BF50 T4 A... and BF50 T4 E...).

Italian Fire Department Directives

These directives provide for a disconnecting device for all current-carrying elements, that can be operated by remote control switch, placed in an easily reached and marked position, in order to safely isolate each part of the installation within the fire system compartment including the photovoltaic (PV) generator. As an alternative, the PV generator must be installed, either externally of the fire system compartment or internally but in a dedicated compartment with adequate fire-resistant features. For such function, specifically designed contactors for on-load use in IEC DC1 duty up to 1000VDC are available.

Operational characteristics

BFK65	65	100
BFK80	75	125
BF80K	90	125
BF110K	110	160

Ambient operating temperature: ≤50°C. For ambient temperatures higher than 50°C and up to 70°C, the maximum operating power values indicated in the table must be reduced by a percentage equal to the difference between the operating ambient temperature and 50°C. E.g.: Using a BFK26 00 contactor at the ambient temperature of 60°C, the maximum operating power (at 400V) of the contactor will be equal to 20kvar – 10% = 18kvar.
 Operating cycle: ≤120 cycles/h
 Electrical life: ≥400,000 cycles.

Add-on auxiliary contacts

The following contact blocks, can be fitted on the BFK contactors: BFX12..., G418..., G481..., G482... and G218.

Certifications and compliance

Certification obtained: CCC, EAC; UL Listed for USA and Canada (cULus - File E93602), as Motor Controllers - Magnetic Capacitive Switches.
 Compliant with standards: IEC/EN 60947-1, IEC/EN 60947-4-1, UL508, CSA C22.2 n° 14.
 Plastic materials are compliant with standards IEC/EN 60335; for BFK versions only, add suffix V260 to the standard product order code.

Kit to assemble BFK contactors

 Example: 11 BG00 40 A230 (auxiliary mini-contactor 4 NO auxiliary contacts supplied at 230VAC 50/60Hz).
 BF00 40 A460 60 (auxiliary contactor with 4 NO auxiliary contacts supplied at 460VAC 60Hz).
- ② Complete the order code with coil voltage digit. Standard voltages are:
 - DC 012 / 024 / 048 / 060 / 110 / 125 / 220V.
 Example: BF00 40 D012 (auxiliary contactor with 4 NO auxiliary contacts supplied at 12VDC).
- ③ Low-consumption version. Complete the order code with coil voltage digit. Standard voltages are:
 - DC 024 / 048V.
 Example: 11 BG00 40 L024 (low-consumption auxiliary mini-contactor with 4 NO auxiliary contacts supplied at 24VDC).
- ④ Maximum combinations of add-on blocks are given on page 2-19.
- ⑤ All contacts are highly conductive.

Operational characteristics

- IEC rated insulation voltage Ui: 690V
- IEC rated conventional free air thermal current Ith: 10A
- UL/CSA and IEC/EN 60947-5-1 designation:
 - BG types: A600-Q600
 - BF types: A600-P600
- Low-consumption version of BG types cannot accept additional contacts.

NOTE: No coil change or replacement is possible.

Certifications and compliance

Certification obtained: CCC, EAC, UL Listed for USA and Canada (cULus - File E93602), as Motor Controllers - Auxiliary contactors for all; RINA for BF00 types. Compliant with standards: IEC/EN 60947-1, IEC/EN 60947-5-1, UL508, CSA C22.2 n° 14. Plastic materials are compliant with standards IEC/EN 60335; for BF00 version only, add suffix V260 to the standard product order code. Example: BF00 40 A230 V260 for BF00 control relay having 4 NO auxiliary contacts and 230VAC 50/60Hz coil with compliant plastic materials.

NOTE: The BF00...D and BF00...L types have a standard supplied built-in TVS (Transient Voltage Suppressor).

11 BGX80 00ⓐ	IP40 front protection	20	0.006
--------------	-----------------------	----	-------

Paralleling links.

11 G323ⓐ	For 2 poles	10	0.009
11 G324		10	0.009
11 G325ⓐ	For 4 poles	10	0.014
11 G326		10	0.014

Rigid connecting kits.

11 SMX90 21ⓐ	Rigid connections for star-delta starter with BG... mini-contactors	10	0.040
11 SMX90 22ⓐ	Rigid connections for reversing switches with BG... mini-contactors	1	0.026

- ⓐ Cannot be used with BG...L types.
- ⓑ Cannot be used with BG...D and BG...L types.
- ⓒ Suitable for left-hand mini-contactor only of BGT and BGTP reversing and BGC changeover assemblies.
- ⓓ The shroud can be used with BG... types with screw termination only and with no auxiliary contacts, surge suppressor or mechanical interlock mounted. It raises the front degree of protection of the mini-contactor when these are used in consumer switchboards.
- ⓔ Cannot be used with BGX80 00 shroud.
- ⓕ Contactors with one NC auxiliary contact, 01 type, are usually used. The SM1 breaker can be directly fitted with rigid connector; type connection SM1X30 40P for SM1P... breaker and connection SM1X30 40R for SM1R... breaker. The relay cannot be directly mounted on the contactor. Use the RFX38 type and the RFX38 04 independent mounting base.

● Certified products; pending for BFX10 1111

RU - UL Recognized for USA only (File E93601) as Auxiliary Devices - Component.

Products having this type of marking are intended for use as components of complete workshop-assembled equipment.

cULus - UL Listed for USA and Canada (cULus - File E93601) as Auxiliary Devices.

CSA - CSA certified for Canada only (File 54332) as Auxiliary Devices for motor controllers.

Add-on auxiliary contacts are compliant with the following standards: IEC/EN 60947-1, IEC/EN 60947-5-1, UL508, CSA C22.2 n° 14.

① The contacts can also be fitted on B type contactors using the adapter G358. See pages 2-26 and 2-28.

② Highly conductive contacts.

③ Normally closed late-break contact.

④ Normally open early-make contact.

⑤ Gold-plated contacts inside tight casing for use in pollutant environments. The I_{th} value refers to 125VAC and 30VDC. IEC IP20 protection is warranted to equipment wired with insulated Faston terminals.

⑥ IEC IP20 protection is warranted to equipment wired with minimum 0.75mm² conductor section.

Designation in DC is Q600 for G418 and G419 types.

⑦ IEC IP20 protection is warranted to equipment wired with insulated Faston terminals.

⑧ IEC IP20 protection is warranted to equipment wired with minimum 1mm² conductor section. Mechanical life is 3 million cycles.

- ① Only for B115-B145-B180-B250-B310-B400-B500-B630-B630 1000.
- ② Not suitable for B630 1000-B1250-B1600.
- ③ For use with three-pole B630 1000, consult Customer Service for information; see contact details on inside front cover.
- ④ Allowed distances see page 2-68.
- ⑤ For contactors B1250 and B1600, two G356 6 mechanical interlocks are required.
- ⑥ Replace with the digit of the voltages if 50 or 60 Hz or with the letter C followed by voltage if DC. The standard voltages are:
 - AC 50/60Hz 48 - 110...125 (indicate 110) - 220...240 (indicate 220) - 380...415 (indicate 380)
 - DC 48 - 110...125 (indicate 110) - 220...240 (indicate 220).
- ⑦ It can be mounted only in contactors if predisposed for it. Consult Customer Service for information; see contact details on inside front cover.
- ⑧ Not suitable for B310 and B310 4.
- ⑨ Provided for one pole terminal only. Example: For three-pole contactors, purchase 3 pieces for the upper terminals only or 6 pieces for all upper and lower terminals.
- ⑩ Replace with the required alphanumeric symbol; each package contains 100 pieces of the same symbol.

● Certified products.

UL - UL Recognized for USA only (File E93601) as Auxiliary Devices - Component.
Products having this type of marking are intended for use as components of complete workshop-assembled equipment.

CSA - CSA certified for Canada only (File 54332) as Auxiliary Devices for motor controllers.

Compliant with standards: IEC/EN 60947-1, IEC/EN 60947-4-1, UL508, CSA C22.2 n° 14; add-on auxiliary contacts also comply with: IEC/EN 60947-5-1.

Combinations: Mounting position on B115-B630 contactors

The add-on auxiliary contact blocks G350 and G354 can be applied to contactors B115-B630 1000 only up to a maximum of four pieces for each contactor, for a total of 12 contacts.
The contact block G350 provides a 2NO+1NC or 1NO+2NC combination depending on its mounting position; see the drawing below. The G354 block consists of 1NO+1NC.

Contact blocks, BFX10 with 2 contacts, G484, G485, G486 and G487 types, can be mounted using the G358 adapter, refer to page 2-18 for exact types and order codes of the blocks.
A maximum of four adapters can be possibly used per contactor and each adapter can hold one BFX10, G484, G485, G486 and G487.

11 BA1671⓪	B250-B310-B400	1	2.290
11 BA1796⓪	B500-B630-B630 1000 B1250-B1600	1	4.650

⓪ Available for AC supply only.

② Add the coil voltage digit. Standard voltages are:

- AC/DC 24 - 48 - 60 - 110...125 (indicate 110) - 220...240 (indicate 220) - 380...415 (indicate 380) - 440...480V (indicate 440).

Example: 11 BA1546 110 for B115-B180 contactor coil assembly suitable for 110-125VAC/DC supply.

③ Add the coil voltage digit. Standard voltages are:

- AC/DC 48 - 60 - 110...125 - 220...240 - 380...415 - 440...480V.

Example: 11 BA1796 110 for B500-B1600 contactor coil assembly suitable for 110-125VAC/DC supply.

For B1250 and B1600 only 110...125 and 220...240VAC voltages are available.

④ When replacing the coil, retrieve the dampers (1 pair for B115...B180 and 2 pairs for B250...B1600) and the fixed core and refit them with the new coil.

MOUNTING POSITION OF CONTACTORS

ON VERTICAL PLANE

The performances given in this catalogue have been established with contactors mounted on a vertical plane with line terminals facing upwards and load terminals facing downwards.

All contactors can be mounted with a $\pm 30^\circ$ inclination to the vertical axis of the contactor without any derating.

For BF series contactors, this inclination can reach $\pm 90^\circ$, that is with the terminals are facing towards left and right.

For BG mini-contactors:

- Position A, with coil terminals A1-A2 facing downwards, is not recommended.
- The position with coil terminals A1-A2 facing upwards is not recommended for mini-contactors with NC contacts.

ON VERTICAL PLANE WITH 30° INCLINATION

All contactors can be mounted on a plane which varies in respect to the vertical up to $\pm 30^\circ$ angle.

On the average, a 5% increase of the minimum pick-up voltage in -30° position can be noted.

This inclination is greater than the one prescribed by main naval registers.

ON HORIZONTAL PLANE (FOR BF SERIES CONTACTORS)

Considerable performance variations can be noted.

It is necessary to check the two possible mounting positions:

- when the contactor is energised, the movable equipment moves upwards.
- when the contactor is energised, the movable equipment moves downwards.

In the first case, it is difficult to close the contactor while in the second, to open it.

The variables which could influence the contactor performance, in addition to the two mounting positions, are:

- type of contactor
- type of control
- contact configuration
- number and type of add-on blocks
- permissible tolerance of auxiliary voltage variation
- ambient temperature.

NOTE: Position B is not recommendable.

Our Customer Service (Tel. 035 4282422; E-mail: service@LovatoElectric.com) can provide further information concerning operational performance of contactors mounted on a horizontal plane.

DYNAMIC TYPE TESTS

Our contactors have sustained dynamic testing, with contactor mounting position rotated $\pm 22.5^\circ$ in respect to the three orthogonal axes.

IEC UTILISATION CATEGORIES DC1, DC3 AND DC5.

POLE CHARACTERISTICS

CHOICE CRITERIA

The elements to be considered for the contactor choice are:

- Rated operational current I_e
- Rated operational voltage U_e
- Utilisation category and L/R time constant
- Eventual verification of electrical life.

OPERATING CONDITIONS

Indicated current is valid for:

- Ambient temperature $\leq 55^\circ\text{C}$
- Operating cycles: up to 120 cy/h with 60% on-load factor
up to 250 cy/h with 30% on-load factor.

POLES IN SERIES

It is important to use contactors with the indicated number of poles in series depending on operating voltage.

The poles in series can be connected to one single polarity or divided between the two polarities of the circuit indifferently.

NOTE. For voltages lower than 30V, the diagrams given in figures 3 and 4 are not recommendable since voltage drops can take place. In these cases, it is better to use poles in parallel considering the notes given in the following section.

Examples of poles in series:

1 POLE

Fig. 1

2 POLES

Fig. 2

3 POLES

Fig. 3

4 POLES

Fig. 4

POLES IN PARALLEL

It is possible to increase the electrical life by placing poles in series when using voltages which require 1 or 2 poles in parallel.

Poles in parallel do not increase the maximum operational current given in the previous pages; that is, if one pole has a maximum operational current in DC5 of 8A, two poles in parallel, it will always be 8A.

With poles in parallel, it is possible to increase the rated contact capacity (Ith) only if the contactor opens and closes in no-load conditions or when used as resistance shunts.

In this case, the contact capacity can be increased.

The value can be obtained by multiplying the rated current of one pole by the K factor given below; e.g.: if one pole carries 10A, three poles in parallel can carry $10 \times 2.2 = 22\text{A}$.

Therefore, the operating current is the one indicated in the tables, multiplied by the K factor given below which takes into consideration the unequal current division on the various poles.

2 POLES in parallel $K = 1.6$

3 POLES in parallel $K = 2.2$

4 POLES in parallel $K = 2.8$

Examples of poles in parallel:

1 POLE in series and
2 POLES in parallel

Fig. 5

1 POLE in series and
3 POLES in parallel

Fig. 6

1 POLE in series and
4 POLES in parallel

2 POLE in series and
2 POLES in parallel

Fig. 8

MAXIMUM OPERATIONAL CURRENT

See tables on pages 2-50 to 2-52.

OTHER CONDITIONS

For different operating conditions or voltage not included among those indicated in the tables, on pages 2-50 to 2-52, consult Customer Service (Tel. 035 4282422; E-mail: service@LovatoElectric.com).

IEC SELECTION GUIDE FOR LIGHTING CIRCUIT SWITCHING

GENERAL INFORMATION

The elements which are to be considered for the contactor choice are:

- Type of lamp
- Power factor ($\cos\varphi$)
- With or without power factor correction
- Value of current when switching on and in running conditions.

Depending on the number and type of lamps, it is also important to bear in mind the main discriminating characteristics given below for the contactor choice:

- Incandescent lamps → contactor making capacity
- Lamps not corrected → rated contactor current in AC1
- Lamps corrected → rated contactor current in AC3

The table below summarises the major characteristics depending on the more commonly used type of lamps:

Type of lamps	Switching on Multiple of I_n ①	$\cos\varphi$	Switching off Multiple of I_n ①	$\cos\varphi$
Incandescent	15	1	1	1
Mixed light	1.3	1	1	1
Fluorescent	1.15 - 1.3	0.2	1	0.3 - 0.5 (not corrected) 1 (corrected)
High-pressure mercury vapour	1.5 - 1.75	0.2	1	0.45 - 0.7 (not corrected)
High-pressure sodium vapour	1.3 - 1.5	0.2	1	0.3 - 0.5 (not corrected)
Low-pressure sodium vapour	1	0.2 - 0.5	1	0.2 - 0.5 (not corrected)
Metal halide	1.7 - 2.1	0.2	1	0.4 - 0.5 (not corrected)
LED	20...40 ②	0.6...0.95	1	0.6...0.95

① I_n = Rated lamp current.

② For 220/240V circuits, either single-phase (between phase and neutral) or 2-wire (between phase and phase), the maximum number of lamps is as per the table.

For three-phase circuits with neutral 380/415V or 220/240V, the maximum number of lamps controlled by the same contactor is $n \cdot 3$.

For three-phase 380/415V circuits without neutral, the maximum number of lamps controlled by the same contactor is $n \cdot \sqrt{3}$.

Electrical life is 100,000 cycles up to 55°C.

③ Incorporated capacitor.

④ Total.

⑤ With reference to the AC side of the power supplies.

LED 220...240V 50/60Hz	See note ②				Each pole can carry 67% of the rated current AC3 ②											

① For 220/240V circuits, either single-phase (between phase and neutral) or 2-wire (between phase and phase), the maximum number of lamps is as per the table.

For three-phase circuits with neutral 380/415V or 220/240V, the maximum number of lamps controlled by the same contactor is $n \cdot 3$.

For three-phase 380/415V circuits without neutral, the maximum number of lamps controlled by the same contactor is $n \cdot \sqrt{3}$.

Electrical life is 100,000 cycles up to 55°C.

② Usually, each light has its own power supply. If a power supply controls several lights, the number of power supplies must be factored into the calculation. The sum of the rated currents of the power supplies connected to each pole of the contact must not exceed 67% of the rated current AC-3 of the contactor indicated on page 2-4.
e.g. BF18 has a rated current AC-3 of 18A; it can control $18 \times 0.67 = 12.06A$ per pole at most.

POWER FACTOR CORRECTION CAPACITORS

CHOICE CRITERIA

The contactor during the closing transition is influenced by electrical currents having high frequencies and high amplitudes. The frequencies of these currents range between 1 and 10kHz; the amplitudes must have values lower than the maximum permissible current peak of the contactor to be used.

AMBIENT OPERATING CONDITIONS

Ambient temperature: $\leq 50^\circ\text{C}$.
 For temperatures higher than 50°C up to 70°C , stated maximum operational power ratings are to be reduced by a percentage equal to the difference between the ambient temperature and 50°C .
 Operating cycle: ≤ 120 cy/h
 Electrical life: $\geq 100,000$ cycles.

B630	610	11000	1000	800	230	400	432	520

The use of contactors with the above operational powers is allowable only when the peak current, in the installation point of the power factor correction board, is lower than the values stated in the table.

If this condition is not verified, it is necessary to use limiting inductances or specific contactors stated on page 2-14. Consult Customer Service (see contact details on inside front cover) to obtain detailed information on the correct use of contactors without limiting inductances.

LIMITING INDUCTANCES

The use of limiting inductances is imperative when the system inductances (line transformer and cables), upstream of the power factor correction panel, are not able to maintain the maximum connecting current within the limit value of the contactor used.

FAST DISCHARGE RESISTANCES OF CAPACITORS

The use of the contactor, according to the wiring diagram given, allows the fast discharge of the capacitors as well as the instantaneous disconnection of the capacitors from the mains when the coil is de-energised.

The resistances, indicated in the following table, guarantee the discharge within a maximum time of 2 seconds.

Capacitor power [kvar]	Voltage 220-230V		Voltage 380-500V	
	[Ω]	[W]	[Ω]	[W]
2.5-5	3900	12	8200	12
10-15	1800	25	4300	25
20-50	1000	50	2200	50

SPECIAL CONTACTORS FOR POWER FACTOR CORRECTION CAPACITORS

GENERAL CHARACTERISTICS

These contactors are equipped with early-make contacts. This special type of contact has the purpose of connecting for a very brief interval, 2-3ms, during the contactor closing, resistors which limit the connecting current of the capacitors. These resistors are then excluded when the closing operation is complete and the current capacity is conveyed to the main contacts. With this type of circuit, it is possible to obtain minor wear of all the components of the system especially fuses and capacitors ensuring a longer life and better reliability. The contactors are particularly suitable for use in automatic power factor correction panels since there is no need of limiting inductances and a source of heat has been eliminated. In this way, these modular electric switchboards can be more compact.

The BFK version, figure 1, is designed for three-phase switching. The peculiarity of this type is in the contacts, suitable to connect limiting resistors, which close only for the time needed to limit any in-rush current peak and then reopen to avoid eventual flow of residual currents through the resistors.

AMBIENT OPERATING CONDITIONS

Ambient temperature: $\leq 50^\circ\text{C}$

For ambient temperature higher than 50°C up to 70°C , maximum operational power ratings, indicated in the table, are to be reduced by a percentage equal to the difference between the ambient temperature and 50°C .

Operating cycles: ≤ 120 cy/h.

Electrical life: $\geq 400,000$ cycles.

AMBIENT CONDITIONS

Operating temperature	°C	-50...+70						
Storage temperature	°C	-60...+80						
Maximum altitude	m	3000						
Operating position	Normal	On vertical plane						
	Allowable	± 30°						
Fixing		Screw or on 35mm DIN rail						

① Derating for use at 61-400Hz. Consult Customer Service for information; see contact details on inside front cover.

② Current values guarantee an electrical life of about 200,000 cycles.

③ IP20 protection warranted by wired equipment; minimum 1mm² conductor section.

④ IP20 protection on front.

⑤ For this other current value, use 16mm² wire with spade cable terminal.

⑥ NO or NC auxiliary is highly conductive. Other characteristics are the same as the mechanical characteristics of the poles.

ELEVATOR EQUIPMENT - Magnetic Motor Controllers per CSA certification File 54332 - Class 2411-03, to requirements of B44.1-04/SME A17.5-2004. Contactors, three or four poles, open type, operating coil 600VAC or less, 380VDC or less.

Safety feature				Closing operations are prevented without arc chutes										

CONTROL CIRCUIT UTILISATION

The input electronic circuit of the contactor coil B115-B1600 is designed and tested according to IEEEC 62.41 and can withstand a 10 kV impulse voltage (1.2/50 μ s) with 50 Joule energy.

For higher values, the use of an auxiliary step-down voltage transformer is recommended.

CONTACTORS WITH MECHANICAL LATCH

Contactors B115-B630 type, can have mechanical latch included or can be predisposed, to be completed with mechanical latch, see pages 2-4 and 2-6 (3-pole version) or 2-8 and 2-10 (4-pole version).

Technical data of mechanical latch G495 type is stated on page 2-26.

MECHANICAL INTERLOCK BETWEEN CONTACTORS SIDE BY SIDE B115-B630
 The G355 type in Fig. 1, can interlock contactors of the same size or of a different one (e.g.: B115 interlocked to B630).

This interlock cannot be used with B1250 or B1600 contactor.
 Consult Customer Service (see contact details on inside front cover) to interlock B630 1000 three-pole contactors.

2

MECHANICAL INTERLOCK BETWEEN CONTACTORS ONE ON TOP OF THE OTHER
 B115.....B1600... (Fig. 1, 2 and 3)
 It is G356... type, which is provided in six types to allow different fixing interaxis of contactors.

The tables below indicate the interaxis which can be obtained with the various interlock types; with terminal protections (INTERAXIS A) and without terminal protection (INTERAXIS B).

Contactors of the same size can be interlocked as well as different sizes.

INTERAXIS A [mm] - For contactors with terminal protection (Fig. 1)

To interlock two contactors B630 1000, use type G356 6 only.
 To interlock two contactors B1250 or B1600, it is imperative to use two pieces of type G356 6 (fig. 3), one fixed on the left side and the other on the right.

Interaxis B is 470-500mm for B630 1000, B1250 or B1600.
 The B1250 or B1600 cannot be interlocked with the other types of the B series.

Fig. 1

Fig. 2

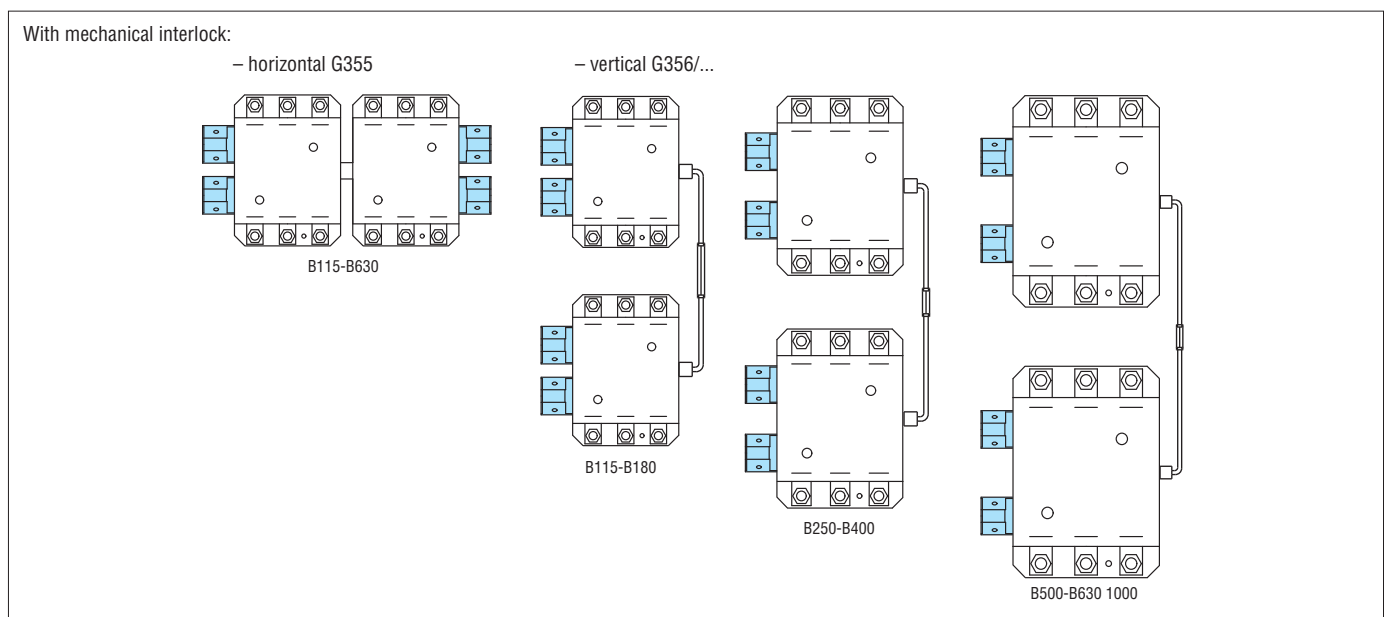

Fig. 3

Horizontal interlock between contactors side by side B115 to B630 1000.
 It is G355 type and can interlock both contactors of equal size and contactors of different sizes (e.g. B115 can be interlocked with B630).
 For contactor B630 1000 (three-pole), contact our Customer Service office.
 This interlock cannot be applied to contactors B1250-B1600.
